PROJECTS

DOC2DOC

Facilitates the rental of medical equipment between licensed professionals.

Built with: Ruby on Rails, Google maps API, Materialize, Photoshop, jQuery UI

Role: Designed ERD in MySQL for Rails controllers. Developed the user interface with consideration of cross device compatibility.

Integrated Google Maps API to show product locations. Implemented jQuery UI Datepicker functionality to select range of start and end date.

DRONE SQUAD

Connects drone pilots, organize races and managing heats worldwide.

Built with: Node.js, Angular.js, Express, MongoDB/Mongoose, Google maps API, Instagram API, Materialize.

Role: Implemented controller middleware in addition to Angular factories and controllers for full CRUD functionality of events, groups, and members. Developed the user interface with consideration of cross device compatibility.

CAREER HIGHLIGHTS
